East End Ave New York NY 10028 My aim in life has been to improve the quality of medical care in the fields of internal medicine, geriatric cardiovascular diseases by research, teaching at undergraduate, graduate, postgraduate levels, and by setting standards and guidelines, and the application of the best of modern knowledge to the practice of medicine in the light of the technology of recent years I have placed particular emphasis on the role of a primary physician for the patient, who will apply his scientific knowledge with compassion and an understanding of the total illness-including the social and emotional aspects of the patient's problem rather than his disease alone. This, as I see it, is the challenge of the modern physician.
